

# Saxon, Fire In The Sky

There's a fire in the sky  
There's a feeling in the air  
When the ground starts to tremble  
The first attack is here  
You won't stand a chance  
When the missiles start to fly  
They never tell the people  
Till the holocaust is here

When the fire's in the sky  
You'll be running for your lives  
When the fire's in the sky  
Prepare yourselves to die

Where, where are the shelters  
They said they would be there  
You'll need, need some protection  
From the radiation flare  
Don't, don't start a panic  
It won't do you no good  
You'll just have to wait  
For the end of all mankind

If you're near the point of impact  
There's nowhere you can run  
If the heatwave don't get you  
The shockwave surely will  
There won't be no more heroes  
There's no one left to fight  
It's the end of our planet  
We'd commit eternal sight

When the fire's in the sky  
You'll be running for your lives  
When the fire's in the sky  
Prepare yourselves to die

When the fire's in the sky  
You'll be running for your lives  
When the fire's in the sky  
Prepare yourselves to die  
To die, to die, to die ...
