

Saxon, Lights Inthe Sky

Silver ships across the sky
Something I have never seen before
Was it true or fantasy
I don't know the answers anymore
All I know is what I saw
Something shooting fast across the sky

Did we see a rocket ship (*)
From another star
Shooting through our galaxy
Coming from afar
I see your lights
Shining in the sky
Shining in the sky

Leave your signs across the land
Mysteries, the answers that we seek
Coming from another world
Seen your circles in the golden sheaf
One day soon we'll talk to you
Find out if you come to us in peace

(Repeat *)
