Saxon, Machine Gun

[Byford/Quinn/Oliver/Dawson/Gill]

Move in to the front underhanded fire Hear the bullets flying millions every hour Tracers in the night shooting across the sky For God's sake cover me I don't wanna die

Machine gun Machine gun Machine gun Machine gun

Over the top into the wire Running like a madman into the fire No-mans land, fighting for your life Fighting hand to hand forced to use your knife

Machine gun Machine gun Machine gun Machine gun

Come the wheels of terror crushing all before Chews you to the bone to hear the monsters roar With the clash of iron the battles never won For the forgotten soldier it's only just begun

Machine gun Machine gun Machine gun Machine gun It's gonna shoot you down

Move in to the front underhanded fire Hear the bullets flying millions every hour Tracers in the night shooting across the sky For God's sake cover me I don't wanna die

Machine gun Machine gun Machine gun Machine gun

Come the wheels of terror crushing all before Chews you to the bone to hear the monsters roar With the clash of iron the battles never won For the forgotten soldier it's only just begun

Machine gun Machine gun Machine gun Machine gun Gonna shoot you down
