Saxon, The Eagle Has Landed

In a giants step of mankind
On a distant lunar sea
As you travel cross the universe
Will you take a step
Take a step for me
Will you take a step for me

The voyage of an eagle
Blasting to the stars
You take the hopes and dreams of men
To find yourself
To find tranquillity
To find tranquillity

Speeding across the universe
And placed a lonely flag
Out there in isolation
At the final
Final frontier
At the final frontier

Celebration
As we wait for your return
You took a giant leap for mankind
On another
On another world
On another world

Take it easy
Take it slow
Don't go fast
Don't let go
The eagle has landed (Repeat 4 times)
