

Saxon, Watching The Sky

Ever since I was a young boy (*)
I turned towards the sky
I know there's something out there
A message in the skies

When the night is black (**)
And the dark is dark
I stand and watch your lights
I long to be there with you
And join you in your flights

I been watching the sky (***)
Waiting for you
I been watching the sky
Calling to you

I wrote up to the government
But I got no reply
They tell us there's no cover up
But I don't believe their lies

Fifty billion planets
There's got to be some life
Don't tell me I'm the only one
Standing in the night

(Repeat *** twice)

(Repeat *)

(Repeat **)

(Repeat *** three times)
