

Scanner, Locked Out

It's so serious
They destroyed all of us
All my comrades they have gone
I'll endure the pain
This hate I cannot tame
Sole survivor alone in space

I was changed to kill the enemy
But they launched me into space

Locked out - five lonesome years
Locked out - they don't know I'm still here
Locked out - for 2000 days
Locked out - so much time to pray

Hear, our fate is just like yours
It's restrained by doubtful cures
We will help you to be free
To return and make them see

I deliberate
How I can infiltrate
All my vengeance must come true
No steel barricades
Could save them from my rage
Whole desire born of hate

Now I'm set free from non-gravity
And I must no longer stay

Locked out - five wasted years
Locked out - they don't know that I am here
Locked out - still I am alive
Locked out - no time to build up hate
