

Scissor Sisters, Any Which Way

Dancing on the speakers,
Are you peaking with the tweakers,
The bigots and the breeders on the scene,
The night don't last forever,
So get your shit together,
Open arms are never what they seem.

I don't need a doctor
Just a simple love concocter,
To slide to my side so civilly
No time a commitment
When I receive your shipment
Oh I need express delivery

Any which way,
Any which way,
You better take me, any which way you can
Any which way,
Any which way,
You better take me, any which way you can

Don't need reservations,
No identification,
To give me your relations,
Sting me like a bee,
I want you to funk me,
Your battleship has sunk me,
You dip me and you dunk me,
Set my body free

Any which way,
Any which way,
You better take me, any which way you can
Any which way,
Any which way,
You better take me, any which way you can

You know baby, when I was taking my pantihose out of their egg this evening I thought: I'm going to

Any which way, any which way, any which way you can
Any which way, any which way, any which way you can
Any which way, any which way, any which way you can
Any which way,
Any which way,
You better take me, any which way you can
Any which way,
Any which way,
You better take me, any which way you can
Ah any which way you can
Ah any which way you can
Any which way,
Any which way,
You better take me, any which way you can
Any which way,
Any which way,
You better take me, any which way you can
Any which way, any which way, any which way you can
Any which way, any which way, any which way you can
Any which way, any which way, any which way you can
