

# Seether, Roses

You feed this disease which you shelter underneath the scars  
and dream of bitter themes rendered helpless by those wicked charms,  
but please don't believe when I say its hard to breathe

Save me even as you break me  
Everytime you rape me  
Leave me coming all undone  
Praise me turn your back and hate me  
Everytime you waste me  
Keep me underneath your thumb

You bleed on the sheets  
Whisper softly how you love the stars  
Then plead on your knees  
Pledge your promises to do no harm,  
but please just let me be  
I still find it hard to breathe

Save me even as you break me  
Every time you rape me  
Leave me coming all undone  
Praise me turn your back and hate me  
Everytime you waste me  
Keep me underneath your thumb [x2]

Save me don't turn your back and break me  
Everytime you rape me  
Leave me coming all undone
