

Shadow Man, Addiction

Drink it up
Suck it up
Sniff it up
Blow it up
You know you love it
But you know what?
You're dead now

You go to the corner to spend your money
On some white powder that you take to keep runnin
From your fear, from your problems so you don't have to deal
You don't have to feel, don't have to be real
But you see it's death that you're dealin in now
You cry and you shout and you pout and you tear
Your heart out from your chest from the pain
You can't take it, it's taking over your body
You're quakin, shakin, uncomfortable now
Crack smacks you up and leaves you without
Any brains to waste and lungs for space
To breathe and recieve life for your being
You're not seeing the vision of truth
Take some drugs, and drugs leads to abuse
You wanna get f**ked up bad just like me
Keep taking that f**kin dogshit speed
And your mind will rot and body will die
And then your spirit will drop into fire
Welcome to hell, your brand-new home
Hope you like it hot, f**k-up homo

Druggie druggie
Keep smackin yourself on up
Druggie druggie
Keep falling flat on up
Druggie druggie
When addiction comes on up
Druggie druggie
Don't you know your time is up

So you drink again to the problems
And you could not solve the problems because
You're so goddamn wasted, you're pacin and racin
And f**kin moving around without inhibition
To give you control, to give you restriction
You just keep makin a f**kin fool of yourself
And you keep on suckin up the cigarette smoke
You may choke, you may get broke, you may find death waitin
But you won't stop, just keep finishin the drugs that you're takin
Whether it's dope or it's speed,
A dope you will be, f**ked up so high
You can't even breathe the night sky
You're passin out, fallin over yourself
Brain's burnt out, erasin your health
Now CPR and Medicare can't help your ass
From being taken when the death bell does pass
And if you do get up and rise again
Hell, you get back to puffin cause you don't know you'll die in the end

Druggie druggie
Keep smackin yourself on up
Druggie druggie
Keep falling flat on up

Druggie druggie

When addiction comes on up
Druggie druggie
Don't you know your time is up

Time is up
Time is up
Up, up, up

Time is up
Time is up
Up, up, up

Last chance to put away the smack
Lay the smack down, before you crack down
And crack up, go insane, become completely deranged
In your head, and you go totally mental instead
Of staying with life on this earth, cause you're goin away
To a far-away place, where the druggie parade
Is sentenced to death, to go far and away
To rot and perish from the sanctity of man
And his land and the people of goodness
Cause this obsess with drugs is makin you a mess
And you can't stop, cause your body needs it
One little puff, and you can't stop takin it
Cause you become addicted, become inflicted
By poison for sale, by death's handy friend
That leads to the end, that leads to the end
Was ten bucks worth the product you get that smokes?
Was fifty worth the horror you get from coke?
Was a hundred grand worth the visions you feel
From the motherf**kin LSD, my man?
I say stop now before you kill yourself
It's too late for the souls of your deadly friends
That wouldn't quit, wouldn't risk
Stoppin the pain in a different way
So lay the bottle down, put the crack away
And think about this, you won't die today
You won't die today, you won't die today

Druggie druggie
Keep smackin yourself on up
Druggie druggie
Keep falling flat on up
Druggie druggie
When addiction comes on up
Druggie druggie
Don't you know your time is up

Druggie druggie
Keep smackin yourself on up
Druggie druggie
Keep falling flat on up
Druggie druggie
When addiction comes on up
Druggie druggie
Don't you know your time is up

Stop the druggin
Save your own life
Save yourself
