

# Silverchair, Learn To Hate

I wanted to be friends with her too  
So my relationship could be the same as yours  
I hated everyone just like you  
Hating you should be introduced as a new law

Take the time to learn to hate  
Come and join the mass debate  
Take the time, take the time  
It's all uphill you've gotta climb

You betrayed all the trust I gave you  
Now I need therapy to hate a little more  
You cannot help me to forgive you  
The drugs have given you all kinds of different sores

As you pump drugs into your bloodstream  
I sit observing in disgust  
Hoping that you will finally come clean  
So I don't have to use this gun
