

# Sinamore, Frozen Mile

Something else to say  
No excuses what it's like  
Life is so strange every night to sleep wide awake  
Yearning for a change I close my eyes  
One stair at the time  
Loneliness my only friend  
Taking a walk far away from here  
Standing frozen behind my fear  
Hiding in your lie  
I look straight into your eyes  
Like when I believed you once  
No one to blame but you  
Coldness stains you  
No one to hold No one to carry this burden for me  
No one there just me and my hate  
Taking a walk far away from here  
Standing frozen behind my fear  
Hiding in your lie  
Taking a walk far away from here  
Standing frozen behind my fear  
Hiding in your lie
