

Sizarr, Timesick

Every step we're taking from now
Feel the days are passing so quick
I'm feeling timesick.
Every curse that is spoken out loud
Is a burden I can't really cope with
Baby I want to quit

Take it from me
Love me when you want
Hold me tightly
You're the only one who cares

Soft and ain't get enough
With honey in my mouth
I'm slowly losing my mind
Bring me to reason

You gotta let go of my body
Cause you're shaking me to my core
Keep me from sleep
You're the only one who dares

So you gotta let it slide
When there's nothing to hold on to
Cracks in the concrete
From out of nowhere

Every step we're taking from now
Feel the days are passing so quick
I'm feeling timesick.
Every curse that is spoken out loud
Is a burden I can't really cope with
Baby I want to quit

What's up with me
There's lava inside of my veins
I'm a nervous system
And the only one who cares
Suffer a little now
I can't resist your charms
Gimme some space
Cause all it feels like

Every step we're taking from now
Feel the days are passing so quick
I'm feeling timesick.
Every curse that is spoken out loud
Is a burden I can't really cope with
So I said: Ooohhhh

Kill the cockerel
Cause he knows it too well
And here in Switzerland it's all in your hands
Cause I've seen what time
Has done to yesterday
And I don't want the same thing
happenin' to me

Every step we're taking from now
Feel days are passing so quick
I'm feeling timesick.
Every curse that is spoken out loud
Is a burden I can't really cope with
Baby I want to quit

Every step we're taking from now
Feel the days are passing so quick
I'm feeling timesick.
Every curse that is spoken out loud
Is a burden I can't really cope with
So I said: Ooohhhh
