

Social Burn, Utopia

I never thought it'd be possible to find someone again
I searched long and hard for someone I didn't know
Instead of my best friend
Now I have her in my arms and I've been trying to say
Those three words won't come out right
So I'll just say

(Chorus)

You take me to
A place with you
That only I feel safe to say
That I'm in love with you

In your arms feels like no harm could be done
To me
The way your chin rests on my head
Your love captures me
Every second of the day
I wish to spend it with you
Now I know the reason I never loved before
Was to save all my love for you

(Extended Chorus)

You take me to
A place with you
That only I feel safe to say
That I'm in love with you
So don't go away
I need you to stay
To hear me say that
I'm in love with you

(Lead Break) (Chorus x2)
