

# Something With Numbers, Against The Wind

Young boy on the computer  
Young girl in her punk rock shoes  
Old man not a believer  
But what the hell is he gonna do

School kids on their computers  
Teachers tearing up their lives  
This boy he's like hot water  
He's steaming up and boiling inside  
I will tie you to the clouds

So you can watch me from the sky

I can't change the direction Of the wind  
but I can change my sails  
so I always reach my destination  
And you can stay up there and watch me from the sky

Young girl don't like her mother  
Cause she has stars in her eyes  
Get a job says her father  
She fell down on her knees and replied  
I will tie you to the clouds

So you can watch me from the sky

I can't change the direction  
Of the wind but I can change my sails s  
o I always reach my destination  
And you can stay up there and watch me from the sky
