Soundtrack - Step up, Step up

Chorus]

Boy

No matter what we go through

You step up, I'll step up too

It don't matter what the haters say

As long as you are my boo

No matter how hard it gets

This love will have no regrets

As long as we'll be

Stepping on the dance floor

It's me and you

[Verse 1]

Feel the rhythm of the beat

That's my heart

Cupid shot me with an arrow

From the start

And you know that it's your loving that's got me trapped

Every time I try to leave, you bring me back

So much harder at times I cried a river

You dried my eyes and brought me back together

And when I lay next to you I want to wake up

And when I break up

It's only to make up

[Chorus]

Boy

No matter what we go through

You step up, I'll step up too

It don't matter what the haters say

As long as you are my boo

No matter how hard it gets

This love will have no regrets

As long as we'll be

Stepping on the dance floor

It's me and you

[Verse 2]

And if we don't step up

We'll lose our groove

So confused, don't know which way to move

Hold my hand and let me know that you feel me too

Look into my eyes and tell me

Baby I love you

You'll never get wet

'Cause I'll be your umbrella

And we can make it through any kind of weather

If you step up

I'll step up

Boy

'Cause I'm trying to be with you forever

[Chorus]

Boy

No matter what we go through

You step up, I'll step up too

It don't matter what the haters say

As long as you are my boo

No matter how hard it gets

This love will have no regrets

As long as we'll be

Stepping on the dance floor

It's me and you

[Bridge]

And when the symphony plays, I feel my feet

Lifting from underneath

You grab my hand

Spin me around

And right before I fall
You catch me and you say
Baby, it'll be okay
Just look into my eyes and we will make another day
[Chorus 2x]
Boy
No matter what we go through
You step up, I'll step up too
It don't matter what the haters say
As long as you are my boo
No matter how hard it gets
This love will have no regrets
As long as we'll be
Stepping on the dance floor
It's me and you
