

# Spiritual Front, First Love Never Dies

All at once I miss you  
So long since I've kissed you  
How I love to look into your eyes  
Yes I still dream about you  
My world is lost without you  
For you are my first love, and  
First love never ever dies  
Whenever I feel lonely  
I'm thinking of you only  
One last kiss and then we said goodbye  
The love I left behind me  
Comes back to remind me  
That you were my first love, and  
First love never ever dies  
The love I left behind me  
Comes back to remind me  
That you were my first love, and  
First love never ever dies  
And if you're thinking of me  
And you find that you still love me  
There's no use to go on living lies  
Let's hurry to each other  
For there could be no other  
Yes, you were my first love, and  
First love never ever dies  
First love never ever dies
