

Spoken Love, Starless

My eyes are running through the miles of tears
Somehow they never get started
Well I just wonder how the sky would feel
For real, could it feel Starless
Just like a broken heart is to you

As time is turning to pull the truth to you
The words never get started
Like the broken heart is

So I can't breathe at night if I can't feel you
(Say that you want it)
(Say that you want me to)
Makes me want to save one touch of you
(Say that you want it)
(Say that you want me to)

Let's ride away and lose the lies they use
For they will never bear heartache
This town is brokenhearted
A ceremony is in your tribal womb
For real, we should all party
So the rythm gets started

So I can't breathe at night if I can't dream you
(Say that you want it)
(Say that you want me to)
Makes me want to taste one touch of you
(Say that you want it)
(Say that you want me to)
I'm in love with you
with you with you
