

# Static X, Machine

I see your bleeding dark side  
I feel your angry heart  
Reveals forbidden places  
More monster yet alive  
No faith  
Changing into something less than human  
No longer part of this  
The influence  
Changing into something less than human  
No longer part of this machine  
No mind  
Changing into something less than human  
No longer part of this machine  
It's chemical  
Changing into something less than human  
No longer part of this machine  
Get into my hidden demon  
Get out of my swollen head  
Shines down on blackened faces  
Changing at your expense
