

# Status Quo, Claudie

(Rossi/Young)

It's so long since I sang songs for you  
I forget all the words I once knew  
I could look back but I can't waste the time  
Did it matter they sometimes didn't rhyme?  
It's so long since I sang songs for you

It's so long since you smiled just for me  
Now your smile's just an old used-to-be  
Does it matter that I can't take the time?  
Would you rather I write you one more line?  
Can my songs once again be for you?

Claudie made a fool out of me  
Made me find another place to be  
I've been living alone  
In a house that wasn't my own  
With Claudie is the place I long to be

When I left, did you think of me crying?  
Did you care that I felt I was dying?  
I pretended that I don't give a damn  
All along I've known what I really am  
I'm a fool little Claudie just for you

Claudie made a fool out of me  
Made me find another place to be  
I've been living alone  
In a house that wasn't my own  
With Claudie is the place I long to be
