

Stellar, Cold Outside

This ain't another winter wonderland ay
It's fuckin freezing and you left me stranded
With every word I see my breath around me
La da da da da de da

I'm up and I'm down and I'm lost and I'm found
Cuz I really fuckin' need to know that you'll stick around
But you're shutting me out and I'm startin' to doubt
That I'm okay

Cuz it's Cold Outside and you won't let me in
Cuz I really fucking needed a friend right now
But this feels like the end
Cuz I've always heard the saying
It rains and it pours, my tears on the floor
I'm here at your door without you
Cuz it's Cold Outside and you won't let me in
I'm a dead man walking again

I can feel the grey skies give me the shivers
Standing on my grave site, middle of winter
I can feel the taste of death and its bitter
La da da da da de da

I'm up and I'm down and I'm lost and I'm found
Cuz I really fuckin' need to know that you'll stick around
But you're shutting me out and I'm startin' to doubt
That I'm okay

Cuz it's Cold Outside and you won't let me in
Cuz I really fucking needed a friend right now
But this feels like the end
Cuz I've always heard the saying
It rains and it pours, my tears on the floor
I'm here at your door without you
Cuz it's Cold Outside and you won't let me in
I'm a dead man walking again
