

Stellar*, Every Girl

Make mine over ice
Gin, lime over ice
You can buy my time for a little while
One to relax
I won't argue with that
Sensitise my blood sugar

I'm not looking for a new religion
I can get it on the television
Need to find a way in this lonely world
That's the side effect for every girl

Tell me everything
Show me everything
You don't even know me or anything
But you can relax
Take some comfort in that
I wont kiss and tell honey

I'm not looking for a new religion
I can get it on the television
I don't need a man to complicate me
I just want someone who stimulates me
Need to find a way in this lonely world
That's the side effect for every girl
The side effect for every girl

I'm letting moonlight have wicked way
Tonight
Educate me, compensate me for living
Life amongst the shadows
