Stick To Your Guns, Fire With Fire

To stand on my two feet

To lock these trembling knees

This is what we need to not fall in the defeat

They cant break me down

And I am sick and tired of fighting fire with fire

We've been misplaced we've been defaced but our heart will never be erased

Fire with fire

We've been misused we've been defused but this fight we will not lose

And I will resist to ever make a fist

Resistance marked as a weakness

Ignorance masked as intelligence

I stand in defiance

Our violence has left us with a head made of stone and a heart just as cold

A youth overdosing on animosity and loathing has made us close the gates and create a beast

A being like no one has ever seen

We have made ourselves mere men among giants

May you stand with me in defiance

May our only defense be letting down our defense

Let defenseless left free of all our fences

No longer will hostility guide us

No longer will hate divide us

No longer will violence undermine us

Fire with Fire!
