

# Still Corners, Fireflies

Howl in the light lost summer night  
Everyone wants to dance in the firelight  
The night as long as we like  
All the innocents of youth in the firelight

No moon rays catch em while you can  
Everyone wants to fly with the fireflies

Heads of the night, a thousand lights  
Moments like these burn in the firelight  
We'll stay as long as we like  
Days of our youth lost in the firelight

No moon rays catch em while you can  
Everyone wants to fly with the fireflies
