

# Sting, Send Your Love (Radio Edit)

Send your love  
into the future  
Send your love  
into the distant dawn

This is your night at the relay (railway?) station  
A mission forward into the unknown  
We'll send a seed to a distant future  
And we can watch a galaxy growin'  
This ain't no time for dialing your power,  
this ain't no time for hidin' your care  
Climbin' down from an ivory tower,  
you've got a stake in the world we ought to share

See the stars they're movin' so slowly,  
but still the earth is movin' so fast  
Can't you see the moon is so lonely,  
she's still trapped in the pain of the past  
This is the time of the world's collidin'  
This is the time of kingdoms fallin'  
This is the time when the world's dividin'  
time to heed your call

Send your love  
into the future  
Send your precious love  
into some distant time  
I'll face that moon in tatters(?)  
with the love of your healin'  
Send your love  
Oh, send your love

No religion but sex and music  
There's no religion but sound and dancing  
There's no religion but line and color  
There's no religion but sacred trance  
There's no religion but the endless ocean  
There's no religion but the moon and stars  
There's no religion but time and motion  
There's no religion just travelled stars

Far better than to watch the ocean  
I see the ripples manage(?) in the distance  
It's just the same with all the emotion  
It's just the same in every instance

No religion but the joys of rhythm  
No religion but the rights of spring  
No religion in the path of hate (hatred?)  
No prayer but the one I sing

Send your love  
into the future  
Send your precious love  
into some distant time  
I'll face that moon in tatters(?)  
with the love of your healin'  
Send your love  
Oh, send your love

No religion but sex and music  
There's no religion that's right or winnin'  
No religion in the path of hatred  
Ain't no prayer but the one I'm singin'

Send your love  
Send your love
