

Stratovarius, Solitude

Welcome to my world, close the door
I don't wanna see nobody anymore
The colors of my life are gone forever
Fading like a dream away from you

My world is all black, there is no light
Long time ago I knew the wrong from right
I still hear your footsteps in the hall
Fading like a dream away from me

And still falls the rain

Solitude is my only friend
How far can I take it?
Solitude, you're my only friend
How long can I face it?
