

Student Rick, October Skies

and Ill be there where you are
and Ill be there when you fall
and I wish upon a star
to be where you are...

and there you were
the stars so bright around you
the moon lighting your face
love so strong it kills to see you drive away
my heart so longs to touch you
and kiss your tears of pain
tear my flesh and watch the pain flow through my veins
I wish that I could hold you
I know I will in time

do you know my pain?
did you see the tears fall from my eyes last night?
do you know my pain?
did you see the tears fall from my eyes last night?
know my pain
know my pain
know my pain
know my pain
now youve gone away...

my thoughts and dreams surround you
when will this day end?
broken hearts will mend together once again
Im losing sight without you
then you reached out your hand
brushed my face
then looked me in the eyes and said
I cant live life without you
I wont forget that time

do you know my pain?
did you see the tears fall from my eyes last night?
do you know my pain?
did you see the tears fall from my eyes last night?
know my pain
know my pain
know my pain
know my pain
now you've gone away...

and I'll be there...
and I'll be there...

to be where you are...
