Supergrass, When I Needed You

Ever wondered how we all get through Maybe someones watching over you All the shit that we face everyday Somehow works itself out anyway

In the back of a stolen car Doin eighty with the headlights off Thats when I needed you

Ever wondered how we all get through Maybe someones watching over you When the ground is falling fast beneath You somehow find yourself back on your feet

In the middle of a shady bar Broken bottles flying through the air Thats when I needed you

Out of my sorrows Livin out hollow steel I look through old photos For hours and hours

In the back of a stolen car Doin 80 with the headlights off Thats when I needed you

Oh, oh, oh oh Thats when I needed you
