

# Surf Curse, Lost Honor

I'm not afraid when I got you on my mind  
They can say what they want but I don't care about your crimes  
They tore my walls, my pictures, my memories  
They can't touch the love in my heart and the things you've given me  
I put my hand on your hip  
And you gave me that look  
I want days where you remember me  
It's what I saw in your eyes  
And what happened that night  
I want days where you remember me  
They make you out to be some kind of monster  
But I only know you as the kindest lover  
But people just want their villains and make-believe  
All for the sake of destroying you and me and our New Year's memories  
When they put me in the cuffs  
And you gave me that look  
I want years where you remember me  
And when we push through the guards  
A final kiss never dies  
I won't lie, will you remember me?  
It's a cruel world, harsh world  
But I know you believe in me  
It's a cruel world, harsh world  
But I know you believe in me  
It's a cruel world, harsh world  
But I know you believe in me  
It's a cruel world, harsh world  
But I know you believe in me  
I don't wanna live and die  
In the public eye, live a private life  
I don't wanna live and die  
In the public eye, live a private life  
I don't wanna live and die  
In the public eye, live a private life  
I don't wanna live and die  
In the public eye, live a private life  
I don't wanna live and die  
In the public eye, live a private life  
I don't wanna live and die
