

Susanna Hoffs, Now And Then

Started out just like any summer
days have felt the life time love
that's when we found each other
and we found ourselves ooh
now and then don't have to look back
now and then you're right here with me
now and then ooh my friend
don't say good bye again
looking in your eyes was like a mirror
every single joy and fear
all for one and one for all
yeah we did it
now and then don't have to look back
now and then you're right here with me
now and then ooh my friend
don't say good bye again
and though it was long, long ago
saw here, here inside our love
now and then don't have to look back
now and then you're right here with me
now and then yeah my friend
don't say good bye again
looking in your eyes was like a mirror
every single joy and fear
all for one and one for all
yeah we did it
now and then
now and then
now and then ooh my friend
don't say good bye
don't say good bye
don't say good bye again
