

Susu, So Natural

I ain't tryna be like Will and Jada
What's the point of being somebody else
I'm not tryna be like Bey and Hova
I think we got it but I wouldn't mind their Wealth
You and me look like the perfect picture
We could be another Barack and Michelle
But what we have baby is so peculiar
We don't need to be like anybody else

This love is so amazing
This love was made for us
This love it drives me crazy
And it is all because

It is your love, my love
We're living our love
We'll never give it up, never giving up
We can't stop, won't stop
We're living our love
I wanna show you off, I wanna show you

How it all comes natural
Oh it all comes natural
And it's also beautiful
How it all comes natural

Baby yes it all comes natural
And it's also magical
And it is a miracle
How it all comes natural, natural

I'm the kinda girl to keep it simple
You're the kinda guy a simple girl would like
Compared to you baby, you have no equal
You're the perfect definition of a vibe

This love is so amazing
This love was made for us
This love it drives me crazy
And it is all because

It is your love, my love
We're living our love
We'll never give it up, never giving up
We can't stop, won't stop
We're living our love
I wanna show you off, I wanna show you

How it all comes natural
How it all comes natural
And it's also beautiful
How it all comes natural

Baby yes it all comes natural
And it's also magical
And it is a miracle
How it all comes natural, natural

Mr Right, you are right fi mi body and soul
Kill 'em with the vibe, number one controlla
You are di king inna mi life, you're so litty litty

Mr Right, you are right fi mi body and soul
Kill 'em with the vibe, number one controlla

King inna mi life, you're so litty litty

Your love, my love
We're living our love
We'll never give it up, now let me show you

How it all comes natural
How it all comes natural
And it's also beautiful
How it all comes natural

Baby yes it all comes natural
And it's also magical
And it is a miracle
How it all comes natural, natural
