## T.Rex, Beltane Walk

Trucking down by the roadside Met a man with a starhide He said boy wouldn't you like to look But could it give me love Give me little love from her heart Bopping down by the whirlpool I met a girl she was god's tool I said girl wouldn't you like to rock But could it give me love Give me little love from god's heart Walking down by the westwind I met a boy he was my friend I said boy we could sing it too And we do Give us love Give us little love Give us little love from your hearts And then we'll walk.
