

Take That, March Of The Hopeful

Remember why we started out
The memory is just a cloud
It only takes a drop to make it rain
You said I was an optimist
The hope in every goodbye kiss
The sun that creeps along the window pane

And what we learn along the way
We win together, lose when we're apart
Saying what you need to say
Don't change a single thing about my heart
And I don't wanna start again
I don't wanna start again
I don't wanna start again

You see it all in black-and-white
Where there's only your side and mine
I want to put the colour in your eyes
Skipping over middle ground
Always up until you're down
We've gotta find a way to compromise

And any time you go away
Reality is catching me off guard
Say what you need to say
Don't change a single thing about my heart

But I don't wanna start again
I don't wanna start again
I don't wanna start again
But we can do it all again
We can do it all again
We can do it all again

We fight, we try
Don't wait around for perfect weather
Fix the holes in the roof together
Take a heart and make it better
Give me hope to fight the daze
For your love, yeah, I'll be waiting
Just because it's hard to see it
Doesn't mean we can't believe it

Do it all again
Do it all again
Do it all again
Do it all
Do it all again
Do it all again
Do it all again
Do it all
