Tanya Tucker, Let The Good Times Roll

It opens up with the same old scene you pushing me on that tire swing Up so high I could almost touch the sky The picture fades to you and me caught stealing a kiss behind the tree It's so real it's like you never said goodbye Every night I turn the lights down low And take out that old video I hold your pillow close in the TV's glow And let the good times roll The road moves on and it always will but I can make time stand still I can turn it back and make things just the same And though you're gone, you're still here, you're far away but always near I can see your face and hear you call my name Freeze frame Every night I turn the lights down low And take out that old video I hold your pillow close in the TV's glow And let the good times roll When it comes to an end I can play it all again You went away but the good old days are here to stay Every night I turn the lights down low And take out that old video I hold your pillow close in the TV's glow And let the good times roll Now it's time to turn the lights down low And let the good times roll Let 'em roll
