Tarja Turunen, I Walk Alone

Put all your angels on the edge Keep all the roses, I'm not dead I left a thorn under your bed

I'm never gone

Go tell the world I'm still around I didn't fly, I'm coming down You are the wind, the only sound

Whisper to my heart When hope is torn apart And no one can save you

I walk alone Every step I take I walk alone

My winter storm Holding me awake It's never gone When I walk alone

Go back to sleep forever more Far from your fools and lock the door They're all around and they'll make sure

You don't have to see What I turned out to be No one can help you

I walk alone Every step I take I walk alone

My winter storm Holding me awake It's never gone When I walk alone

Waiting up in heaven I was never far from you Spinning down I felt your every move

(I walk alone)

I walk alone Every step I take I walk alone

My winter storm Holding me awake It's never gone When I walk alone
