

# Taylor Swift, My Own Way

I don't want to break your heart  
But you just keep on pushing me  
I want to walk away  
But you have ways of stopping me  
I don't know what to say  
Its just that I really want to leave  
Cause your holding me back, holding me back from the life of luxury

[Chorus]:

So let me go my own way  
Opposite from you  
I don't care what you have to say  
My hearts not in the mood  
Though I really love you  
You just keep hurting me  
You say tell you what to do to make me happy  
The only way is for you to let me leave  
When ever we go out  
I'm just a friend to you  
But when we at home  
You want to call me your boo  
An I hate the fact  
That when she comes around you make me go away  
Its like you can't make up your mind  
This is all I have to say

[Chorus]:

So let me go my own way  
Opposite from you  
I don't care what you have to say  
My hearts not in the mood  
Though I really love you  
You just keep hurting me  
You say tell you what to do to make me happy  
The only way is for you to let me leave

[Bridge]:

You say I can count on you  
But you just playing games  
An I just let it slide  
When call her name  
You don't get it  
I'm trying so hard not to walk away  
But see now I'm tired of your two faces  
So I'm just going to go my own way

[Chorus]:

So let me go my own way ( My own way)  
Opposite from you ( From you, from you, from you)  
I don't care what you have to say  
My hearts not in the mood ( Not in the mood)  
Though I really love you  
You just keep hurting me ( You just keep hurting me)  
You say tell you what to do to make me happy  
The only way is for you to let me leave ( Let me leave)  
So let me go my own way  
Opposite from you  
I don't care what you have to say  
My hearts not in the mood  
Though I really love you  
You just keep hurting me  
You say tell you what to do to make me happy  
The only way is for you to let me leave  
Let me leave, an go my own way  
Let me leave, an go my own way  
Let me leave, an go my own way  
Let me leave, an go my own way...
