

# Terra Naomi, No Reason

I&#039;m loving you from a distant place  
Can&#039;t face you head on  
The sting of your smile across the frozen space  
When all familiar love is gone

Well you gave in and i guess baby i gave out  
I see that i don&#039;t have the strength to control you  
And this is the way that it&#039;s got to be i have no doubt  
But you got your fair-weather friends to console you

But i still love you&#65533;

Well, i&#039;m loving you from a distant place  
Got you still in my sight  
With my telescope eyes on your weary face  
Who&#039;s that girl you&#039;re with tonight

There is no future for us baby that&#039;s for sure  
That&#039;s what i told you  
I&#65533;m sickened by pictures of girls walking in and out your door  
And just because i cannot hold you don&#039;t mean i don&#039;t want to

Ya, i still love you&#65533;

Don&#039;t give me no reason  
Not til you&#039;re sure  
Don&#039;t give me no reason  
To hope for more&#65533;
