

Terra Naomi, No Reason

I'm loving you from a distant place
Can't face you head on
The sting of your smile across the frozen space
When all familiar love is gone

Well you gave in and i guess baby i gave out
I see that i don't have the strength to control you
And this is the way that it's got to be i have no doubt
But you got your fair-weather friends to console you

But i still love you�

Well, i'm loving you from a distant place
Got you still in my sight
With my telescope eyes on your weary face
Who's that girl you're with tonight

There is no future for us baby that's for sure
That's what i told you
I�m sickened by pictures of girls walking in and out your door
And just because i cannot hold you don't mean i don't want to

Ya, i still love you�

Don't give me no reason
Not til you're sure
Don't give me no reason
To hope for more�
