The Church, Terra Nova Cain

Turn down the gravity, this is all too heavy I'll show you how the ancients once traveled They used to call this a Chevy Just before the continents sank, you could still go outside I was sitting on a hot off ramp She pulled up and asked me if I needed a ride

Terra nova cain I need you again Deep space jam on an alien terrain Terra nova cain I need you again Some for the little boys who live down the lane

I should have known there was something amiss
She had unearthly eyes
She had a way of sifting through your mind
Like she'd done it to a million guys
She said will you help with our research
I said take me to your leader
She put her foot down on the oscillation pedal
She was a transdimensional speeder

Terra nova cain I need you again
Protect me from the meteor rain
Terra nova cain I need you again
Put your exploratory probe right into my brain

They brought me back after thousands of years I hadn't aged at all We used to float around her weightless bedroom That drove me right up the wall

Terra nova cain I need you again You dropped me off and you've left me quite drained Terra nova cain I need you again Help me break these telekinetic chains
