

The Cure, I Can Never Say Goodbye

Utwór 'I Can Never Say Goodbye' to nowość od The Cure.

Thunder rolling you to drown
November moon in cold black rain
This lightening tears the sky apart
And whisper his name

He has to wake up
Love slipping away
Hear the bells across the sea
It's almost too late

Shadows growing closer now
There is nowhere left to hide
I can't wake this dream to sleep
However hard I try

I'm down on my knees around
Aching inside
Something wicked this way comes
From out that cruel November night
Something wicked this way comes
To steal away my brother's life
Something wicked this way comes
I can never say goodbye

Something wicked this way comes
From out that cruel and treacherous night
Something wicked this way comes
To steal away my brother's life
Something wicked this way comes

I can never say goodbye
