

# The Cure, This. Here And Now. With You

This  
Here and now  
With you

Oh please dont ask me who I am  
Or when and where my life began  
Or why I ended up like this or how  
Dont ask me what I was before  
If I was anything at all  
Its nothing you can know  
About me now

You hold my spinning head to stare  
And strip me bare of memory  
Your black eyes burning into me  
So slow  
The sounds and lights and others fade  
And fall away in symmetry  
Your black eyes burning hungrily  
And unafraid I know

Everything I ever dared forget is here  
Too scared before I never let  
Tonight be all I need  
Everywhere I never tried to get is here  
Too tired before to ever let  
Tonight be all I feel  
Every time I ever thought regret is here  
Too caught before I never let  
Tonight be all I dream  
There isnt any yesterday  
Tomorrow starts a day away  
This here and now with you is how  
Always should always be

This  
Here and now  
With you

I cant believe its coming true  
Im so up close to kissing you  
A breath away from never going home  
I dont remember getting here  
It seems to be sometime next year  
I hope you wont be  
Leaving me alone?

No please dont tell me who I am  
Or when and where my life began  
Or why I ended up like this or how  
Dont tell me what I was before  
If I was anything at all  
Its nothing you can know  
About me now

You pull my shaking body close  
To make the most of tangency  
I bite your mouth so fearfully  
And slow  
The taste of summers yet to shine  
A perfect time to change the scene  
I bite your mouth in urgency  
And terrified I know

Everything I ever dared forget is here  
Too scared before I never let  
Tonight be all I need  
Everywhere I never tried to get is here  
Too tired before to ever let  
Tonight be all I feel  
Every time I ever thought regret is here  
Too caught before I never let  
Tonight be all I dream  
There isnt any yesterday  
Tomorrow starts a day away  
This here and now with you is how  
Always should always be

This  
Here and now  
With you
