## The Jesus And Mary Chain, Between Planets

Suicide standing sucking in her cheeks Too much lips and too much eyes Hasn't slept for weeks She don't know just where it goes

Jackie T said she saw death She's done it fifty ways But she's been off that medicine For almost fifteen days She don't know just where it goes

So turn around and run back where you're from You can't get on Don't shake those hips don't bite those lips Just keep it hid

Come on now you gave it away And all the friends you had got paid Come on now you were never that shy And that's no way for you to say bye bye

Baby you drive me crazy Don't come around here no more
