

The Monkees, You And I (Justus Version)

After all the spotlights and the flowers
After all the parties and goodbyes
There was something in the air
Something that we realized we would always share

And it was You and I
You and I

After all the music and the madness
After all the late night fantasies
We knew that we would make it through
There was little in our way
Nothing they could do

'Cause it was You and I and promises not broken
You and I and magic memories
After all was said and done they never understood
How we always made it. We knew we always would

'Cause it was You and I
You and I

Now it seems that we are still together
And all the others never made it through
Someday they'll learn our secret way
It isn't such a secret, it isn't hard to do

'Cause it's You and I and promises not broken
You and I and magic memories
After all was said and done they never understood
How we always made it. We knew we always would
'Cause it was You and I
You and I
You and I
