

The National, The Perfect Song

Ten years older than I was
What I brought you down to see,
What I thought would make you fall in love
Wearing off on our dreams
Someday man I'm gonna be no different than the other rivers
I tried to look at you but I couldn't break the ice
You stood out there for an hour freezing
Put your hand around my back
I guess you thought I needed that
I never try to find you
I hope you don't remember me
I hope you're not alone
Wanted me to take you home
You said you'd rather be alone
I never thought of that
Car is warm and we had wine
But I couldn't find the perfect song
Now our furniture for the one with crows feet and I Can't even remember the call
Sometimes I can feel your weight when I close my Eyes
Seven times I was under you
I never try to find you
I hope you don't remember me
I hope you're not alone
I don't wanna know what you're thinking
I'm looking out the window
Just fucking drinking
Shallow frame and shaky sticks but I know there's a River in me
Shallow minded adult tricks but I know there's a River in me
