

The Smile, The Same

We don't need to fight
Look towards the light
Grab it in with both hands
What you know is right
Somebody's falling down
Somebody's telling lies
Simple-ass motherfuckers
With one mistake after another

People in the streets
Please
People in the streets

Somebody's hearing voices
(Somebody's going down, down, down)
You're going down
You're going down
You're going down

People in the streets
Please
We are one, the same
Please
We are all the same
Please
We are one, the same
Please

We are all the same
We are one, the same
We are one, the same
