

# Thomas Rhett, Where We Started (feat. Katy Perry)

I'd come through, round two  
And pick you up right after your shift  
Drive that Chevrolet like a getaway  
You'd be counting your tips  
Windows down and screaming, I will wait for us  
Everybody, just wait for us  
Yeah, we're coming, just wait for us  
Those days when you're brokenhearted  
And you're getting knocked down and you're saying  
Don't know how far we're gonna go, just  
Look at that road and think about where we started  
Keep your eyes on me 'cause talk is cheap  
We're all we need, yeah  
Darling, I know how far we're gonna go just  
Look at that road and think about where we started  
I've been playing my guitar, singing  
Them covers in an empty room (covers in an empty room)  
You know one day I would make a  
Living outta singing 'bout you (living outta singing 'bout you)  
Windows down and screaming, I will wait for us  
Everybody, just wait for us  
Yeah, we're coming, just wait for us  
Those days when you're brokenhearted  
And you're getting knocked down and you're saying  
Don't know how far we're gonna go just  
Look at that road and think about where we started  
Keep your eyes on me 'cause talk is cheap  
We're all we need, yeah  
Darling, I know how far we're gonna go just  
Look at that road and think about where we started  
And how far we're gonna go  
And all the things we're gonna see  
If you wonder 'bout our future  
Think about our history  
Those days when you're brokenhearted  
And you're getting knocked down and you're saying  
Don't know (don't know) how far we're gonna go, just  
Look at that road (that road) and think about where we started  
Keep your eyes on me 'cause talk is cheap  
We're all we need, yeah  
Darling, I know how far we're gonna go just  
Look at that road and think about where we started  
Mhmm, oh, whoa  
Where we started
