

# Three Days Grace, Scared

At night I hear it creeping  
At night I feel it move  
I'll never sleep here anymore

I wish you never told me  
I wish I never knew  
I wake up screaming  
It's all because of you

So real these voices in my head  
When it comes back you won't be  
Scared and lonely  
You won't be scared you won't be  
You won't be scared and lonely  
You won't be scared you won't be lonely

I know there's something out there  
I think I hear it move  
I've never felt like this before

I wish you never told me  
I wish I never knew  
I wake up screaming  
It's all because of you

So real these voices in my head  
When it comes back you won't be  
Scared and lonely  
You won't be scared you won't be  
You won't be scared and lonely  
You won't be scared you won't be lonely

Its all because of you  
I wish you never told me  
I wake up screaming now  
So real these voices in my head  
So real these voices in my head  
I wake up screaming now  
I wish you never told me  
I wish I never knew

Scared and lonely  
You won't be scared you won't be  
You won't be scared and lonely  
You won't be scared you won't be lonely

Scared and lonely  
You won't be scared you won't be  
You won't be scared and lonely  
You won't be scared you won't be lonely
