

# Tiger Army, Swift Silent Deadly

We're the masters of the night  
Both death and glory on our side  
Mess with the fucking best  
And get fucked up like all the rest  
You won't hear us when we're coming...

We're back again  
We're on the scene  
And when we strike it's swift, silent deadly  
When we strike it's swift, silent - deadly!

We seek, strike, destroy  
Like tigers born to kill  
For those who just can't understand  
We'll let you know the fucking deal  
You won't hear us when we're coming...
