

# Tosca, Jay Jay (feat. J.J. Jones)

Into the primitive one the origin gods  
Expressed in paintings,  
Reign absence, a thing far away from the fire  
Free from lost desire  
I?m dear like, I?m dear like, I?m dear like

Go away with me, in the holy entity  
We rise above, to eve last in ...  
We will shine into the night high away

Another time, another place  
Another voice, another face  
Another sign, another reign  
A place where everybody sings  
Another time, another place  
Another voice, another face  
Another sign, another reign  
A place where everybody sings

Go away with me, in the holy entity  
We rise above, to eve last in ...  
We will shine into the night high away

Another realm, another reign  
Aother dawn, another day  
Another song, another scream  
A place where everybody sings  
I?m dear like, I?m dear like, I?m dear like

Another place, another face  
Another place, another face  
Another place, another face  
Another place, another face

Apple pies, apple pies  
Here all eating, apple pies, apple pies  
We?re all eating apple pies, apple pies.
