## Traffic, Riding High

Don't be afraid, love, when the storm comes We're gonna make it through on our own Don't you, don't you ever let go of my love Think about it, if you believe then it will be

We'll be riding high and we won't look down See our spirits flying to that higher ground

Over and over, oh, the storm raged I held you in my arms to keep you warm No, you, no, you never let go of my love Through the darkness you were the light that shone on me

Now we're Riding High yeah and we don't look down with our spirits flying to the higher ground

Every step I took, through everything I've done

When the lightning struck you were the only one you were the only one you were the only one oh No you no you never let go of my love through the darkness you are the light that shines on me

Now we're riding high yeah and we dont look down with our spirits flying to that higher ground we're riding high yeah and we dont look down with our spirits flying to that higher ground we're riding high yeah and we dont look down with our spirits flying to that higher ground (repeat chorus)
