

# Tricky, Together Now

(Tricky/Neneh Cherry/Mark Saunders)

Into the morning  
Got me through the night  
I've seen the light  
I see the light  
I love of what I need  
I've got greed  
I've been a sinner for as long as I know  
So help me understand  
The little that I know  
Shadow dancing with my spirit  
Got to face your demon on your own  
Take my body and put it through the dust  
I've been buried in the crust  
Together now  
So help me understand  
The little that I know  
Together now, together now  
It's us now, It's us now  
And there's them, and there's them  
And should we start again  
Together now, together now  
It's us now, it's us now...  
The descendants of Christ  
And it's you  
Will you help me I'm confused  
What you gonna do  
With the little that I know  
With the little that I got  
We're together now, we're together  
It's us now  
And there's them, and there's them  
And should we start again  
Together now, together now  
It's us now, it's us now...
